

## KI 7000 Series General Features

### Hand held Fiber Optical Loss Test Equipment

#### Practical and Reliable!

- The instrument's ergonomic design fits comfortably in the hand for extended periods.
- Colour identification is a practical way to pick an instrument.
- The instruments are engineered to maximise productivity and measurement confidence.
- LED Sources have built in mode equaliser

#### What you always wanted...

- Quick-change optical connectors offer increased versatility and convenience. This economical patented design is the same for all instruments.
- Optical connectors are dust and drop protected by a snap-on cover for improved performance and reliability.
- On some KI 7000 instruments, an unused port can store a spare quick-change connector.

#### Practical and Reliable!

- Battery life in excess of 190 hours on sources, meters and attenuators means improved convenience and productivity, so forget about re-charging equipment and procedures.
- C or AA size alkaline batteries are readily available.
- The sealed calibration feature inside the battery compartment prevents unauthorised changes to calibration, while still allowing user calibration without opening the instrument.

# KI 7000 Series General Features

## Autotest!

- Autotest enables two source and meter instruments to communicate and synchronise set up wavelength and source power level. This de-skills measurements and improves productivity and measurement confidence.
- The bi-directional loss test sets offer major productivity gains, and display the two way averaged loss reading at two wavelengths.
- Hidden keypad keeps the main keypad simpler.
- Back lit display helps in poor lighting.

## Smooth record keeping (KITS™)

- Excel spreadsheet software provides quick and easy PC data acquisition and report generating.
- Active X / OLE programming tools are easy to use to enable custom functional integration with most software packages including Labwindows.
- Memory and printer functions allow you to work the way you like.

## Accessories to help you perform

- Leather holster, carry strap and carry cases for 1, 2.
- The optional mains power pack works anywhere in the world.
- Interchangeable adaptors cover SC, FC, ST, LSA, E2000, MU, LC, D4, SMA, styles and others.
- The comprehensive user manual is easy to follow, and will help get you started.

## Quality is how we do business!

- Since 1993, Kingfisher's NATA traceable calibration laboratory has had similar credentials to the NIST NVLAP program, which has not been attained yet by our USA or Canadian competitors.
- These instruments offer superior accuracy and performance over the full range of conditions.
- Kingfisher has had ISO9001 accreditation since 1993.

- Our reliability record is second to none, with many instruments over 10 years old still in service.
- All instruments pass rigorous EMC, environmental and drop tests during development.
